

Press Release:

## Chandra Asri Petrochemical Supplies Resins for Toyota

**Jakarta, 9 February 2017** - Polypropylene Impact Copolymer resins which produced by PT Chandra Asri Petrochemical Tbk ("the Company"), Indonesia's largest integrated petrochemical company, meets the specifications defined by PT Toyota Motor Manufacturing Indonesia ("TMMIN") to be used as raw material for the manufacturing of car components for Toyota Vios and Yaris.

This success is a major breakthrough for Indonesia petrochemical industry in entering the automotive component sector that apply international standards which have been supplied by other countries. In addition to a new marketing field that will continue to increase along with the development of the automotive industry, this breakthrough will support the efforts of the Republic of Indonesia government to strengthen the national industrial structure because this mutually beneficial cooperation between the Company and TMMIN also improves the performance of compounding and molding industry in the country, namely PT Hexa Indonesia who adds additives and coloring in resins and PT Sugity who mould the resins into automotive components.

Besides Toyota Vios and Yaris, the Company also plans to supply the models for Fortuner and Kijang Innova as well as other cars of LCGC Toyota. Currently, other brands which have used the Company's Polypropylene Impact Copolymer are LCGC Daihatsu and Honda cars and motorcycles.

Ultimately, the import substitution for these resins and car components can save the country's foreign exchange.

### About CAP

CAP, a subsidiary of PT Barito Pacific Tbk as the majority shareholders, is Indonesia's largest integrated petrochemical company producing olefins and polyolefins. CAP incorporates state-of-the-art technologies and supporting facilities located in Cilegon and Serang of Banten Province. CAP is the only producer who operates a naphtha cracker, and is the sole domestic producer of ethylene, styrene monomer and butadiene. In addition, CAP is also the largest polypropylene producer in Indonesia. CAP produces plastic raw materials and chemicals used for packaging products, pipes, automotive, electronics, etc. For more information, please visit [www.chandra-asri.com](http://www.chandra-asri.com).
