**Affirming its Sustainability Commitment,  
Chandra Asri Petrochemical Installs New Enclosed Ground Flare  
to Reduce Environmental Impact**

**Jakarta, 28 May 2018** – PT Chandra Asri Petrochemical Tbk (CAP) has awarded Toyo Engineering Corporation (TOYO) and Inti Karya Persada Teknik (IKPT), TOYO's Indonesian subsidiary, as the engineering, procurement and construction contractors for the installation of a new Enclosed Ground Flare (EGF) at its petrochemical complex in Cilegon, Banten.

EGF is a safe, smokeless flare technology that significantly reduces any air pollution, noise, heat and light emission during a plant start-up and irregular operational activities. Application of EGF will ensure that there is minimum operational impact to the environment and surrounding communities compared to conventional flare use.

"Installation of EGF in our plant demonstrates our commitment to sustainability where we invest in the latest technology to ensure that our operations does no harm to our surroundings. We believe that as a company, we have the responsibility to do what is right for the environment and the communities we live in," said Erwin Ciputra, President Director of CAP.

The development of EGF, with a total investment of \$ US 14 million, is expected to be completed by 2020. It will have a designed capacity to burn 220 tons of hydrocarbons per hour. TOYO will be in charge of engineering and offshore supply, while IKPT will be in charge of a part of engineering, local supply and construction.

**About CAP**

CAP, a subsidiary of PT Barito Pacific Tbk as the majority shareholder, is Indonesia's largest integrated petrochemical company producing olefins and polyolefins. CAP incorporates state-of-the-art technologies and supporting facilities located in Cilegon and Serang of Banten Province. CAP is the only producer who operates a naphtha cracker, and is the sole domestic producer of ethylene, styrene monomer and butadiene. In addition, CAP is also the largest polypropylene producer in Indonesia. CAP produces plastic raw materials and chemicals used for packaging products, pipes, automotive, electronics, etc. For more information, please visit [www.chandra-asri.com](http://www.chandra-asri.com).
